## FOUNDATION PROGRAMME AND BRIDGE COURSE

### MAR ATHANASIOS COLLEGE FOR ADVANCED STUDIES TIRUVALLA (MACFAST)

#### GUIDELINES AND OBJECTIVES OF BRIDGE COURSE

The basic qualification for admission to each post-graduate course in MACFAST is graduation. Hence, students with different basic disciplines in degree are eligible for admission to MBA, MCA, and Biosciences courses. Therefore the academic retreat prepares plans for relevant bridge courses in each of these departments.

The bridge course is intended to bridge the gap in the knowledge and schemas of the students admitted to various post-graduate courses. Unlike the usual post-graduate degrees, wherein a student is allowed to join for post-graduate study only on the basic discipline of his graduation, the professional courses like MBA, MCA, and Biosciences allow different graduation streams with more than 50% marks to opt for the course. Hence, there is a wide gap between the syllabi prescribed for the post-graduate course and their basic understanding at the graduation level. But there are also a sizable proportion of the applicants with the relevant basic degrees. Therefore, before the commencement of the regular classes, it becomes necessary to bring the students with basic graduation in different areas to the level of the relevant group.

Thus the following are the guidelines and objectives of the bridge course

1. On completing the admission process, prepare a list of students with different basic graduation and identify the knowledge gap.

2. To determine the depth of the syllabus required to connect the students with the relevant course paper and to assess the time required for its completion.
3. To conduct a preliminary screening test on the relevant course papers to determine the individual gap of students and to identify students requiring special attention
4. To assign duty to the concerned faculty members with the required syllabus and the schedule for time-bound completion.
5. To decide periodical assessment test of the progress of the students with different basic graduation
6. To collect the feedback of students for further analysis

## **ZERO-SEMESTER INDUCTION PROGRAMME FOR MBA 2020-22 BATCH**

On 29<sup>th</sup> July, the zero-semester induction programme was conducted for the new students on the Zoom platform. The new students were provided with an orientation about the MBA programme and two short-term assignments – a presentation on their dream company and a book review - were given to them. Students are required to submit their reports on these two assignments and present them in front of all the students and faculty members.

**Manual for Zero semester induction programmes is enclosed below:**

**Procedure Manual for Zero Semester PPT Presentation for S1 Students 2020-2022 Batch**

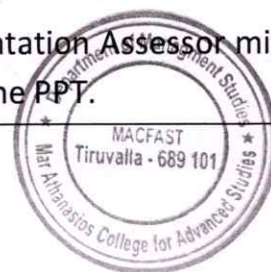

**Department of Management Studies, MACFAST**

**Stage 1- Before Presentation**

1. The faculty has to evaluate Assignments and PPTs uploaded by the students in Google Classroom named 'Batch 1-Zero Semester Assignment'.
2. The faculty has to evaluate two assignments [Corporate Story Telling and Book Review] & two PPTs [Corporate Story Telling and Book Review] per student.
3. Access to this classroom is shared via email.
4. The allotment file named PPT Evaluation Schedule is also shared with you all via mail and WhatsApp.
5. You have to ensure that you are giving reviews to allotted students before their presentations.
6. The date and time of the presentation could be obtained from the weekly published Zero Semester PPT Presentation Schedule.
7. Kindly ensure timely PPT submission of your students and provide reviews and suggestions within the scope of Google classes.
8. Please note that faculty has to evaluate only the respective PPTs of the students allotted to you as per the PPT Evaluation Schedule.

**Stage 2 - On the Day of Presentation**

1. The weekly timetable for the presentation will be published and will be shared via mail and WhatsApp. This timetable contains information regarding the Date of Presentation, Time of Presentation, Presenters List, and Assessors list.
2. Please note that for a student, the Presentation Assessor might not be the same as the faculty who evaluated the PPT.

3. You may have to enter as the host of the presentation.
4. Use the Zoom ID mba.four@MACFAST.org for hosting the presentation
5. Password remains the same for this ID.
6. The presentation time is 12.00 to 1.00 PM.
7. Record the presentation and click on the option to save the in clouds.
8. The leaders of the batch will support the faculty in organizing and conducting the presentations.
9. Kindly assess the presentation and provide oral feedback to the presenter.
10. Kindly note the attendance list of students

### Stage 3 - After Presentation

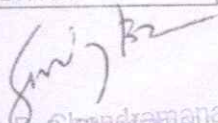

Immediately after the session record your feedback about the presentations by using Feedback Google Form.

## **COMMUNICATION SKILLS TRAINING PROGRAMME**

## ENGLISH SCORE CERTIFICATION PROGRAMME FROM BRITISH COUNCIL

English Score is a quick and accurate test of student's English level. This is a free test conducted and authorized by British Council aiming to improve the proficiency over the English Language. The English Score test is an assessment of grammar, vocabulary, reading and listening skills. The test is 72 questions in length, comprising 48 grammar and vocabulary questions followed by 24 listening and reading items. The score of this test is sufficient to prove student's English level to an employer, prepare for an exam such as IELTS and get personalised recommendations to help the students to achieve their goals. Communication and skill development programme insisted the students to acquire English Score by attending this test. Total **154** students bagged their English Score Certificate.

## TRAINING ON WEBSITE PROJECT

### Syllabus of Website Project by Department of Computer Applications

#### HTML and CSS COURSE SYLLABUS Department of Computer Applications MACFAST

Overview: HTML and CSS go hand in hand for developing flexible, attractive, and user-friendly websites. HTML (HyperText Markup Language) is used to show content on the page whereas CSS is used for presenting the page. HTML describes the structure of a Website semantically along with presentation cues, making it a mark-up language, rather than a programming language. HTML allows images and objects to be embedded and can be used to create interactive forms.

#### Course Objectives:

- HTML is highly flexible and supported on all browsers.
- User-friendly and open technology.
- It gives better performance.
- CSS provides powerful control over the presentation of an HTML document.
- CSS saves many times as it can be reused in many HTML pages.
- CSS can be used to make responsive web pages, which are compatible on multiple devices. It can be used to allow the web pages to display differently depending on the screen size or device on which it is being viewed.

### Pre-requisite / Target Audience:

Any beginner who wants to build career as Web designer can take this course.

### Module 1: Web Programming Introduction

- In this module, you will learn a basic introduction to web development. The fundamental technology is used to define the structure of a webpage.
- Web Development Introduction

### Module 2: HTML-Introduction

- This module sets the stage, getting you used to important concepts and syntax, looking at applying HTML to text, how to create hyperlinks and how to use HTML to structure a webpage.  
History of HTML
- What you need to do to get going and make your first HTML page
- What are HTML Tags and Attributes?
- HTML Tag vs. Element
- HTML Attributes:
- How to differentiate HTML Document Versions

### Module 3: HTML-Basic Formatting Tags

- In this module, HTML is used to specify whether your web content should be recognized as a paragraph, list, heading, link, image, multimedia player, form, or one of many other available elements or even a new element that you define.
- HTML Basic Tags
- HTML Formatting Tags
- HTML Color Coding

### Module 4: HTML-Grouping Using Div Span

- In this module, The HTML <div> and <span> element is the generic container for flow content and does not inherently represent anything. Use it to group elements for purposes such as styling (using the class or id attributes), and inline-level and block-level separation.
- Div and Span Tags for Grouping

## Module 5: HTML-Lists

- In this module, The HTML `<li>` element is used to represent an item in a list. It must be contained in a parent element: an ordered list (`<ol>`), an unordered list (`<ul>`), or a menu (`<menu>`). In menus and unordered lists, list items are usually displayed using bullet points, now we are going to check how to use HTML list
- Unordered Lists
- Ordered Lists
- Definition list

## Module 6: HTML-Images

- In this module, the Web was just text, and it was quite boring. Fortunately, it was not too long before the ability to embed images (and other more interesting types of content) inside web pages was added. There are other types of multimedia to consider, but it is logical to start with the humble `<img>` element, used to embed a simple image in a webpage. This module will help you to make use of image mapping
- Image and Image Mapping

## Module 7: HTML-Hyperlink

- In this module, Hyperlinks are important. They are what make the web a web. This module shows the syntax required to link, and discusses link best practices.
- URL - Uniform Resource Locator
- URL Encoding

## Module 8: HTML-Table

- In this module, representing tabular data on a webpage in an understandable, accessible way can be a challenge. This module covers basic table markup, along with more complex features such as implementing captions and summaries.
- `<table>`
- `<th>`
- `<tr>`

- <td>
- <caption>
- <thead>
- <tbody>
- <tfoot>
- <colgroup>
- <col>

#### Module 9: HTML-Iframe

- In this module, The HTML <iframe> element represents a nested browsing context, effectively embedding another HTML page into the current page. This module will help you make use of the iframe tag
- Attributes Using
- Iframe as the Target

#### Module 10: HTML-Form

- In this module, Forms are a very important part of the Web — these provide much of the functionality you need for interacting with websites, e.g. registering and logging in, sending feedback, buying products, and more. This module gets you started with creating the client-side parts of forms.
  - input>
  - <textarea>
  - <<button>
  - <select>
  - <label>

#### Module 11: HTML-Headers

- In this module, The HTML <head> element provides general information (metadata) about the document, including its title and links to its scripts and style sheets.
- Title
- Base

- Link
- Styles
- Script
- Meta

#### Module 12: HTML-Miscellaneous

- In this module, The HTML <Meta> element represents metadata that cannot be represented by other HTML meta-related elements, like <base>, <link>, <script>, <style> or <title>.this module will help you learn Meta tags, xhtml and deprecated tags
- HTML Meta Tag
- XHTML
- HTML Deprecated Tags & Attributes

#### Module 13: CSS2-Introduction

- In this module CSS is used to style and layout web pages — for example, to alter the font, colour, size, and spacing of your content, split it into multiple columns, or add animations and other decorative features. This module gets you started on the css path.

##### Benefits of CSS

- CSS Versions History
- CSS Syntax
- External Style Sheet using <link>
- Multiple Style Sheets
- Value Lengths and Percentages

#### Module 14: CSS2-Syntax

- In this module, the basic goal of the Cascading Stylesheet (CSS) language is to allow a browser engine to paint elements of the page with specific features, like colors, positioning, or decorations. The CSS syntax reflects this goal and its basic building blocks are
- CSS Syntax
- Single Style Sheets
- Multiple Style Sheets

- Value Lengths and Percentages

#### Module 15: CSS2-Selectors

- In this module, CSS selectors define the elements to which a set of CSS rules apply. In this module, you will find how many selectors are there how to use it
- ID Selectors
- Class Selectors
- Grouping Selectors
- Universal Selector
- Descendant / Child Selectors
- Attribute Selectors
- CSS – Pseudo Classes

#### Module 16: CSS2-Color Background Cursor

- In this module, CSS Backgrounds and Borders is a module of CSS that lets you style elements backgrounds, and borders. Backgrounds can be filled with a color or image, clipped or resized, and otherwise modified. Borders can be decorated with lines or images, and made square or rounded.
- Background-image
- Background-repeat
- Background-position
- CSS Cursor

#### Module 17: CSS2-Text Fonts

- In this module, CSS Fonts define font-related properties and how font resources are loaded. It lets you define the style of a font, such as its family, size and weight, line height, and the glyph variants to use when multiple are available for a single character
  - color
  - background-color
  - text-decoration
  - text-align

- vertical-align
- text-indent
- text-transform
- white-space
- letter-spacing
- word-spacing
- line-height
- font-family
- font-size
- font-style
- font-variant
- font-weight

#### Module 18: CSS2-Lists Tables

This module lists a table that defines how to layout table data.

- list-style-type
- list-style-position
- list-style-image
- list-style
- CSS Tables

- I. border
- II. width & height
- III. text-align
- IV. vertical-align
- V. padding
- VI. color

#### Module 19: CSS2-Box Model

- In this module, the CSS box model defines the rectangular boxes—including their padding and margin—that are generated for elements and laid out according to the visual formatting model.
- Borders & Outline
- Margin & Padding
- Height and Width

- CSS Dimensions

#### Module 20: CSS2-Display Positioning

- In this module, the position CSS property specifies how an element is positioned in a document. The top, right, bottom, and left properties determine the final location of positioned elements.
- CSS Visibility
- CSS Display
- CSS Scrollbars
- CSS Positioning
  1. Static Positioning
  2. Fixed Positioning
  3. Relative Positioning
  4. Absolute Positioning
- CSS Layers with Z-Index

#### CSS Floats

- In this module, the float CSS property specifies that an element should be placed along the left or right side of its container, allowing text and inline elements to wrap around it. The element is removed from the normal flow of the web page, though remaining a part of the flow (in contrast to absolute positioning).
- The float Property
- The clear Property
- The clear fix hack

#### OUTCOME:

At the end of the course, participants will be able to get:

- Basic & thorough understanding of HTML & CSS
- Coded a handful of useful HTML & CSS examples
- Focus on building a beautiful, semantic, HTML & CSS web page
- Impressed on self, and will be able to hit the ground running with newly acquired skillset
- Start building beautiful websites
- Build a portfolio website, can highlight best web work
- Get the ball rolling for a career in web design

### **Manual and Review results for Website Project**

**Website Project** refers to the **design** of websites that are displayed on the **internet**. It usually refers to the user experience aspects of **website development** rather than software development. A **web designer** works on the appearance, layout, and, in some cases, content of a **website**.

### **Objective**

Website Project is the process of creating websites that reflect a company's brand and display information to visitors. It requires the adjustment of different components to create a dynamic and user-friendly experience. You can learn the web design process to create your site for your business or to

become a professional web designer and create sites for clients. In this article, we explain what web designing is, including the elements and uses of the process.

### **What is web designing?**

Web designing is the creation of websites and pages to ensure an effective and enjoyable user experience. Web design identifies the goals of a website or webpage and promotes accessibility for all potential users. This process involves organizing content and images across a series of pages, integrating applications and other interactive elements. It also entails selecting an attractive style and color scheme.

The professionals who perform this process are called web designers, and their job includes the following duties:

- Selecting easy-to-read fonts
- Choosing attractive color schemes that also enable easy-to-read fonts
- Implementing a brand's identity into the colors, fonts, and layout
- Creating a map of the website's structure to ensure intuitive navigation
- Placing images, logos, text, videos, applications, and other elements
- Using coding languages, such as HTML and CSS, to create layouts and to style pages
- Making optimized versions of websites and pages both for desktop and mobile viewing

There are two common web design methods: adaptive and responsive design. In adaptive design, the website content is created using standard screen sizes as the frame for the layout. In responsive design, content moves dynamically according to the screen size. Web designers use the various steps of the general web design process to employ these design methods depending on their client or employer's preferences and goals for the site

# **LIFE SKILLS TRAINING PROGRAMME**

## **YES PLUS –YOGA MEDITATION LIFE SKILLS TRAINING AND BREATHING EXERCISES**

All the students have undergone a 24 hrs workshop on life skills – Youth Empowerment and Skills Plus (YES!+) - conducted by the Art of Living Foundation. This intensive and highly engaging training programme includes sessions on Yoga, Pranayamas (breathing exercises), meditations, healthy diets, techniques to improve concentration, memory, stress management, decision-making skills, communication, interpersonal skills, mind management, etc. This year's programme was conducted mostly on the zoom platform. The refresher session 'Reconnect' has conducted both online and offline mode.

## **REFRESHER PROGRAMMES ON LIFE SKILLS**

Regular one-hour sessions on various life skills were provided to the students every Wednesday. These interactive sessions named "Reconnect", enable students to improve their communication, leadership skills, confidence level, team building, ability to take initiatives, etc. From the year ~~2019~~ 2021, this programme was provided as a part of regular schedule too.

Dear All,

We are happy to announce that we have been privileged to be part of **edX** - which is a massive open online course (MOOC) provider **created by Harvard and MIT**. It hosts online university-level courses in a wide range of disciplines to a worldwide student body, including some courses at no charge. It also conducts research into learning based on how people use its platform - just as our COURSERA

We have been identified as an institute to be part of their **edX Remote Access Program** by which MACFAST is provided with free enrollment codes which can be utilized to access their selective 500 premium self paced courses which could come into a cost range of \$50 to \$450 to be studied free of cost.

Grab this **opportunity to access as this coupon validity ends by 30th June** - that is we have to register for those selective list of course by that date once enrolled this validity will not be a problem because you will be streamlined along with the course and can get a certificate at the end of each such course

Teachers will be getting a **maximum of 8 coupons**, that is you can select 8 courses.

We are providing the **course list in google sheet** for your reference. Please go through it and each of you identify which course is suitable (the courses listed might not be confined strictly to any of our three department areas but some courses could be useful with respect to the subjects you study) - you can click on the link provided for each courses to explore more on the course - **You have to identify such 8 courses**

You will be shared with a **google form in 2 days to note the seven courses you prefer to choose and submit the same**. accordingly you

You will be shared with a **google form in 2 days to note the seven courses you prefer to choose and submit the same**. accordingly you will be receiving six links allocated coupon embedded within the courses you preferred by submitting in the form

Click the link to know about the **list of 500 courses available to MACFAST** :

## ENTREPRENEURSHIP SKILL DEVELOPMENT PROGRAMME

This includes various programmes conducted by Startup Kendra for You (SKY) and MACFAST Technology Business Incubator (M-TBI). The following are activities conducted in the year 2020-2021 are as follows:

### **Supporting Business Plan Preparation**

A business plan is expected to cover the basics of the business, viz. value proposition, products & services, market analysis, competition analysis, funding requirements, capital structure, milestones & timelines, development & marketing plan, organization structure, team, risk analysis, break-even period & financial budgets. The applicant can include any additional information they think would help in the assessment of their proposal.

Apart from the physical infrastructure stated above, M-TBI also offers other supports and services which would include:

- Pool of mentors, experts in technology, legal, financial and related matters, with or without considerations.
- Meetings with industry professionals
- Organizing events to help companies in networking

M-TBI will facilitate the incubate companies to access departmental laboratories and other resources of MACFAST for their products development purposes. Availability of such resources is subject to prior permission from the department concerned to avoid any conflict with its activities. They arrange interaction with industry experts and subject maestros once in two months. Industry –academia innovative practices are conducted through the support of start-up Kendra. The experts from reputed companies and professionals will be able to mould the potential students productively.

## SCIENCE AWARENESS PROGRAMME

School of Biosciences conducted science awareness programmes by way of workshops/seminars/webinars for their students. The resource persons were from reputed National and International universities. This year's programme commenced on 5<sup>th</sup> June 2020

### Science Awareness programme Webinar/Seminar series commenced from 5<sup>th</sup> June 2020

Date	Programmes	No. of students participated	Resource person and organization
5th June 2020	"Journey from student to Researcher"	149	Ajith Ashokan Research Scholar, IISER, Bhopal
10th June 2020	"Emerging trends and opportunities in Life Science Research"	146	Gitanjali Yadav , Ph.D. , MNASc Staff Scientist V National Institute of Plant Genome Research (NIPGR) New Delhi & Lecturer, Department Lecturer, Dept. of Plant Sciences, University of Cambridge
22nd June 2020	"Recent Advances in Food Packaging Technology"	150	Dr. Arun Kumar P CSIR-Central Food Technological Research Institute
29th June	Nutraceuticals, pomegranate and	160	Dr.R.P.Singh CFTRI

2020	punicic acid		
1st July & 3rd July 2020	" Chromosome Structure and Segregation"	164	William C. Earnshaw, Ph.D.,FRS, FRSE, FMedSci
7th July 2020	" The Chemical Language of Nature"	167	Dr. Shannon Olsson, National Centre for BiologicalSciences (NCBS) Bangalore
10th July 2020	"Science, biology, and the world's future"	158	Bruce Alberts, Ph.D. Chancellor's Leadership Chair in Biochemistry and Biophysics for Science and Education, University of California, San Francisco,
13th July 2020	Cryopreservation strategies for long term conservation of germplasm	160	Dr. Era VaidyaMalhotra ICAR-National Bureau of Plant Genetic Resources
15th July 2020	"Modern Analytical Instrumentation and their Applications in Food Science"	166	Vatcharavelu K. Central Instrumentation Facility,CSIR- CFTRI Mysore
16th July 2020	Progress and pitfalls in COVID-19 vaccine development	176	Gagandeep Kang Executive Director Translational Health Science and Technology Institute

			(NCR Biotech Science Cluster, Faridabad
17th July 2020	"Cancer Nanotechnology"	180	Dr.P.Gopinath Ph.D., Associate Professor, Department of Biotechnology, Joint faculty in Centre for Nanotechnology, Indian Institute of Technology Roorkee, Roorkee -247 667, Uttarakhand, India.
23rd July 2020	"Science: the joy of Figuring things out."	178	Alejandro Sánchez Alvarado, Scientific Director, Investigator Howard Hughes Medical Institute Investigator Stowers Institute for Medical Research Missouri
27th July 2020	"Lessons Learned in Lockdown"	179	Christopher P. Baines, Ph.D., Associate Professor, Department of Biomedical Sciences, University of Missouri Columbia
29th July 2020	Traffic jams in healthy neurons regulate cargo flow	180	Sandhya P. Koushika, Ph.D. Associate Professor Department of Biological Sciences Tata Inst. of Fundamental Research Homi Bhabha Road, Colaba Mumbai

1 <sup>st</sup> August 2020	Going Viral: Evolution and Spread of SARS-CoV-2	155	Prof. Partha P Majumder, Ph.D., National Science Chair National Institute Of Biomedical Genomics Kalyani, West-Bengal
3 <sup>rd</sup> August 2020	Regulation of rapid adaptive responses in microorganisms	167	Sander Granneman, Ph.D., MRC Senior Non-Clinical Research Fellow in RNA Biochemistry and Group Leader University of Edinburgh
8 <sup>th</sup> August 2020	Introduction to Tissue Engineering: The State of the art technology to Repair and Regenerate the human body	178	Dr. GauriKulkarni, Research Scientist, Wake Forest Institute for Regenerative Medicine (WFIRM, North Carolina, USA)
9 <sup>th</sup> August 2020	Indigenous development of strategic materials for societal benefits: One step ahead towards self-reliant India	179	Dr. Bipin Kumar Gupta, Principal Scientist & Associate Professor (AcSIR) Asia-Pacific Academy of Materials (APAM) Fellow Photonic Materials Metrology Sub Division, Advanced Materials and Device Metrology Division CSIR-National Physical Laboratory, New Delhi
