**Date: 30th October 2021,
Saturday**

Time 9.30 AM to 10.30 AM

Workshop on “Adding Value to Your Innovation “

In association with MACFAST, a national level **online workshop on 'Adding value to your research through translation'** to introduce the concept of technology transfer to the students and faculty with speakers who are experts in the field of research and technology transfer was conducted on Saturday 30th Oct 2021 by TIMed, the technology business incubator of SCTIMST inculcating the culture of incubation and entrepreneurship among the biomedical aspirants. The National Biopharma Mission under the Biotechnology Industry Research Assistance Council (BIRAC) has established a Regional Technology Transfer Office at TIMed called **TIPS@TIMED** to take a lead role in mentoring and supporting other academic institutions and organizations to facilitate technology commercialization activities and to strengthen their Intellectual Property management portfolio. In the innovation ecosystem within academia, there are a lot of promising ideas and innovations that have immense market potential but are limited just to research publications. Most of the academia fail to understand the market value of their innovations and lacks information on how to translate the shelved inventions to benefit society. TIPS aims to pave a way to create industry-academia partnerships and support start-up/spin-offs so that promising inventions can be brought into the limelight. 91 participants have attended the event.
