Report on the workshop

“Cake making for prospective entrepreneurs”

09th of December, 2017

While you may be wondering how to start a cake business from home, there are many other home bakers who have already converted their passion into a successful business and have started selling cakes from home. This industry is rapidly growing and there's heavy competition. According to another research study, the Indian cake market is projected to grow at a steady rate. From the past few years, there's a high demand for customized and artisanal cakes as well. Factors like product innovations in terms of new flavours rise in disposable income and changing consumer tastes and preferences are the key drivers of the segment. This is where home bakers have a role to play and a business space to explore.

MACFAST has catered to these demands by arranging a training programme on Cake making in this regard. A 2 Day training program on cake making, for prospective entrepreneurs was conducted on 07th and 08th of December, 2017. The coordinator and the main resource person of the program was Mrs. Pinchu Elizabeth Thomas. The registration was handed by Mr. Biju Dharmapalan, School of Biosciences. A total of 8 participants attended the training programme to start cake making as a business.
