

**MACFAST
Research Forum**

Detailed Activity Report

2018-2021

INTRODUCTION

The research forum was created with the objective of providing a common platform for the exchange of scientific thoughts. As an initiation into research, the faculties holding PhD degree would present their PhD related work to the faculty of all three departments and interested students could also attend this presentation. The purpose of the presentation would be in discussing the problems faced in selecting a subject, implementation of the work plan, how the objectives were described for the proposed work and the challenges faced during the completion of the work. This annex thesis presentation aims to instigate scientific temper in both the faculty and the students. The forum provides a proper channeling of the resourcefulness of faculty colleagues in linking and promoting inter-disciplinary research. The meetings were held once every month and the presentations were handled by the faculties from Department of Management studies, Department of Computer Applications and the School of Biosciences who have a PhD degree. The schedule proceeded normally till the start of the lockdown. The presentations have now been rescheduled to the online platform until the current situation prevails. Dr. Jenny Jacob has been appointed as the faculty coordinator
