**Abstract:** A learning system based on authorized teaching with the help of electronic resources is known as E-learning. While teaching can be based in or out of the classrooms, use of computers and the Internet forms the major component of E-learning. The concept of e-learning and self-reliant India plays a vital role in present era. E-learning was conducted mainly in developed countries. Online learning activities are important for the development of any country. The study focuses on analysing the importance e-learning, techniques and methods used for e-learning and how e-learning pay path for creation self-reliant India. The basic objective of the study is to understand the concept of online learning and to examine the type of E-learning. This paper also summarizes on several opinions regarding the differentiation between traditional learning, classroom learning and e-learning.

**Key words:** - E-learning, Techniques, Self- reliance, Advantages

## Introduction

A learning system based on standardised teaching but with the assistance of digital sources is known as E-learning. The use of computers and the Internet create the essential element of E-learning it can also be termed as a network permit

transfer of knowledge and skills, and the delivery of education is made to a large number of beneficiaries at the same or different times. Earlier, it had been not admitted wholeheartedly because it was presumed that this system be without the human element required in learning. With the quick progress in technology and the evolution in learning systems, it is now accepted by many of us.

Atma Nirbhar Bharat, which means 'self-reliant India' or 'self-sufficient India', is the sight of making India "a bigger and more important part of the global economy", track policies that are well planned, competitive and powerful, and being self-sustaining and self-generating. Atma Nirbhar Bharat does not mean 'self-containment', 'set apart from the world' or being "protectionist". During the announcement of India's economic package associated with COVID 19 the primary mention of this came within the sort of the 'Atma Nirbhar Bharat Abhiyan' or 'Self-Reliant India Mission'. Various sectors, like agriculture, medicine, education, services, business, and government setups are adapting to the thought of E-learning which helps in the advancement of a nation. By e-learning to make India a self-sustaining economy therefore any other crisis that may emerge in future could be efficiently tackled.

According to a new study by Global Market

08.06.2022

those which still have the traditional approach towards learning. Government of India is strongly keen to bring certain digital reforms that may be a big push for the growth of the e-Learning industry. Through e-learning we can make India a self-sustaining economy therefore any other crisis that may emerge in future could be efficiently tackled.
