11 Admission Procedure

Attached as Annexure – XII

12 Criteria and Weightages for Admission

For MBA, The admissions to the MBA full time programme is strictly on the basis of merit as determined by the entrance examinations KMAT Kerala / CMAT / CAT, and Group Discussion and Personal Interview conducted at the institution level. The college follows the guidelines and time schedule of Mahatma Gandhi University and Admissions Supervisory Committee (ASC) of the Government of Kerala.

Admissions – Components of Rank List

Entrance Examination Score : 80%.

Group Discussion : 10%.

Personal Interview : 10%.

Based on the score in the entrance test, candidates are short-listed for Group Discussion and Personal Interview. While preparing the rank list, if there are the same index marks for more than one candidate, he/she will be ranked on the basis of actual marks obtained in the qualifying exam. Even after this, if there is a tie, they will be ranked on the basis of date of birth; i.e. the elder person is to be ranked higher. Based on the performance on the written test, group discussion and interview, the merit list will be prepared and published by the college.

The Reservation Rules are applicable as per the Government norms.

For MCA, The admission procedure in the affiliated colleges should be based on the norms stipulated by the Admission Supervisory Committee (ASC) and approved by Mahatma Gandhi University. The total seats are divided into two categories : 50% of the total seats come under Government Quota & 50% under Management Quota. Admission to Government Quota is through the allotment process based on the Kerala MCA Entrance rank list (LBS). The rank list shall be prepared on the basis of sum of following components:

- Entrance Examination Score 70%
- Academic Qualifications 20%
- Personal Interview 10%
- Total 100%

- xix** Games and Sports Facilities

Our institution strongly believes in the holistic development of students by promoting physical fitness, teamwork, and a healthy lifestyle. The college offers a range of well-maintained sports facilities that cater to the diverse interests of students, encouraging both recreational participation and competitive excellence.

The campus features a **standard basketball court**, providing students with the perfect space to engage in fast-paced games and intercollegiate competitions. In addition, a **well-equipped volleyball court** is available, regularly hosting practice sessions and tournaments that foster team spirit and coordination.

For indoor and precision-based sports, the college provides a **dedicated badminton court**, enabling students to develop agility, reflexes, and competitive skills in a structured environment.

Understanding the importance of fitness and strength training, the college also offers **fully functional gymnasiums in both the men's and women's hostels**. These gyms are equipped with essential fitness equipment, allowing students to maintain their health and wellness conveniently within their residential spaces.

Our sports infrastructure is designed not only to support academic excellence but also to nurture athletic talent, discipline, and overall well-being. The institution continues to encourage students to actively participate in sports and fitness activities, ensuring a balanced and enriching campus life

- xx** Teaching Learning Process

As an institution offering Post Graduate and Under Graduate programmes, emphasis is given to integrating skills and knowledge from multiple sources. The institution has a team of qualified and well-experienced full-time faculty members. The enrolment of students is based on the regulations and guidelines of the Government of Kerala, Mahatma Gandhi University, and other regulatory bodies. The students are admitted to various programmes ensuring transparency, inclusivity, and equity. The participative method of the teaching-learning process is made effective through the use of ICT-enabled classrooms. Student-centric teaching methodologies such as case studies, group discussions, practical training, outbound experiential learning, etc. are also used in the teaching-learning exercise. The learning levels of the students are continuously assessed. Advanced learners are encouraged to have joint publications, project-based learning, and online certification courses. Slow-learners are provided with remedial coaching to enhance their learning levels. An effective mentoring system is also implemented in the college. The institution adheres to the Academic Calendar to execute its activities. Details of POs, PSOs, and COs are communicated to various stakeholders and are published on the official website. The

Examination Monitoring Committee (Exam monitoring Cell under control of Examination from 2026 onwards) deals with the conduct of examinations and redresses the grievances if any, reported by the students. The college has a track record of securing top ranks consecutively in various programmes and maintaining high pass percentages over the years. A feedback system is implemented as a corrective mechanism for ensuring the quality of teaching, learning and evaluation process

DETAILS OF LABORATORY FACILITIES

DEPARTMENT OF BIOSCIENCES

<i>Sl. No.</i>	<i>Expt.</i>	<i>Equipment</i>	<i>Qty.</i>
1	To cultivate and grow bacteria or other microorganisms under controlled temperature	Bacteriological Incubator	1
2	To determine the biochemical oxygen demand of water samples	BOD Incubator	2
3	To separate components of a mixture based on their density by spinning them at high speeds	Centrifuge	3
4	To measure the concentration of a specific substance in a solution by analyzing its absorbance or transmittance of light at a particular wavelength	Colorimeter	5
5	Observing the cellular structure and morphology of various biological specimens	Compound Microscope	7
6	To observe and analyze microscopic organisms or structures in various samples	Compound Microscope(LED)	3
7	Separating cellular components by their density gradients for further analysis	Cooling Centrifuge	1
8	To mix or homogenize samples in tubes or vials, for biochemical assays or sample preparation	Cyclomixer	1
9	To store biological samples at ultra-low temperatures	Deep Freezer	2
10	To monitor changes in pH during a chemical reaction or biological process	Digital pH transmitter	3
11	To separate and purify liquids based on their boiling points	Distillation unit (Double)	1

12	Measuring the absorption spectrum of a compound to determine its concentration in a solution.	Double-Beam UV-Visible Spectrophotometer	1
13	To separate DNA, RNA, or proteins based on their size and charge	Electrophoresis Apparatus	2
14	Gently mixing gel samples to ensure even distribution of DNA or protein bands.	Gel Rocker	1
15	Provides vigorous mixing or agitation of samples in containers	Heavy Rotary Shaker	2
16	Sterilizing glassware and equipment at a high temperature	Hot Air Oven	5
17	To heat or boil solutions, facilitating various chemical reactions or sample preparations in laboratory experiments.	Hot Plate	2
18	Provides a controlled environment with precise temperature and humidity settings	Incubator	1
19	Provides a sterile work environment essential for handling sensitive biological materials	Laminar Air Flow	4
20	To freeze-dry biological samples, preserving them for long-term storage	Lyophilizer	1
21	Employed for stirring liquids in laboratory experiments	Magnetic Stirrer	2
22	Utilized for quick and efficient centrifugation of small volumes of samples	Mini Centrifuge	1
23	Provides a controlled environment with gentle agitation for culturing cells or incubating biochemical reactions	Orbital Shaking incubator	1
24	To amplify specific DNA sequences through repeated cycles of heating and cooling,	PCR	1
25	Enables the extraction of compounds from solid samples	Soxhlet Apparatus	2
26	Utilized for small-scale stirring of liquids in laboratory experiments	Spinnix- Mini Stirrer	1

27	Employed for visualizing fluorescently labeled biomolecules such as nucleic acids or proteins	UV-Trans Illuminator	1
28	Provides a stable and controlled temperature environment	Rotek rectangular water bath	4
29	Utilized for vortex mixing of samples in tubes or microplates	Tarson spinwin	1
30	Employs ultrasonic waves to effectively clean laboratory equipment and glassware	Antech Ultrasonic cleaner with Basket	1
31	Precise and portable weighing of substances, facilitating accurate measurements in laboratory experiments	Portable Electronic Balance	4
32	Combines both incubation and shaking functionalities, providing a controlled environment	Water bath incubator shaker	1

Innovation Cell & Media Cell

Innovation Cell (MICS)

MACFAST Innovation and Corporate Synergy (MICS)

MACFAST innovation and corporate synergy is a brainchild of MACFAST, which helps the future aspirants in unleashing their talents and bridging the gap between corporate and campus. MICS assist the students in meeting up the corporate expectation and reaching their career goals. It facilitates the career progression through major five approaches. They are,

- Mentorship programme – Alumni Interaction
- Industry Interaction – Industry experts /Visiting faculty Interaction
- Industrial Visits
- Internships
- Campus to Corporate Connect

Mentorship Programme

MICS offers unique mentorship programme to students through alumni interaction. MACFAST is blessed with strong alumni track records and support. Through this exceptional mentorship programme, students will be able to receive information about various career perspectives, progression and personal experience. The mentorship programme is offered once in three months.

Industry Interaction

MICS arranges interaction with industry experts and subject maestros once in two month. Industry interaction is a platform through which the expectations of the industry as well as the students are being discussed and met. The professionals and experts from reputed companies will be able to mould the potential students in a productive manner.

Industrial Visits

Industrial Visits let the students understand practical aspects of theoretical knowledge to practice through interaction, working methods, employment practices and exposure to modern technologies. Visit to different companies helps the students in broadening their mind-set to have a clearer vision about future goals in his/her entrepreneurial /corporate journey.

Internships

The internship programs are designed to provide field experience to the students with an opportunity to share their insights. It gives clear link between students' academic preparation and their field work, and thereby developing and carrying out the major research project which will serve to culminate their internship experience. Internships are tailored to the needs and interests of each student in the

program. As part of the internship experience, students are expected to take an active role in finding and doing an appropriate internship for themselves.

Campus to Corporate Connect

The Campus to Corporate Connect enhance the transition from college to a corporate environment. Students are being introduced to various clubs associated with Finance, HR, Marketing, IT and Science. Students are given an introduction regarding the working of each club and are mandated to join any club of their preference. The club is responsible for finding new project opportunities and the students are responsible for project formulation. They can pitch their project ideas with the aid of Entrepreneurship Development and Innovation Club, wherein the project can be implemented. The MoU's with different companies may also help the students in doing short term internship as part of their studies. This will also enable to ensure a long term relationship among college and companies.

ANNEXURE XI

**List of Experimental Setup in
each Laboratories/ Workshop**

MAR ATHANASIOS COLLEGE FOR ADVANCED STUDIES TIRUVALLA (MACFAST)

DEPARTMENT OF FOOD TECHNOLOGY & QUALITY ASSURANCE

FOOD TECHNOLOGY LAB

1. List of Experimental Setup in Food Technology Laboratory / Workshop

The Food Technology Laboratory is equipped with pilot-scale and analytical instruments to support processing, preservation, and quality evaluation of food products.

A. Processing Equipment (Experimental Setup)

- Blancher – for enzyme inactivation
- Double Seamer – for can sealing
- Evaporator – for concentration of liquids
- Fruit Pulping Machine – for pulp extraction
- Horizontal Freezer – for frozen storage
- Juice Extractor – for juice processing
- Mechanical Sifter – for particle size separation
- Microwave Oven – for heating and drying studies
- Retort – for thermal processing and sterilization
- Ribbon Blender – for mixing food materials
- Roaster – for roasting operations
- Sealing Machine – for packaging
- Storage Tank with Agitator – for liquid mixing
- Storage Tanks – for bulk storage
- Tray Drier – for dehydration studies
- Vacuum Packager – for modified atmosphere packaging

B. Analytical Instruments

- Colorimeter (3 units) – for color analysis
- LED Microscope (2 units) – for microstructural observation

2. Laboratory Facilities Exclusive to the Post Graduate Course (Food Technology Lab)

The postgraduate laboratory provides advanced practical training in **food analysis, processing, and product development.**

A. Food Additive Analysis

- Estimation of iodine in iodized salt
- Estimation of saccharin
- Estimation of sodium benzoate
- Estimation of sulphur dioxide
- Estimation of propyl gallate and sorbic acid
- Estimation of chlorophyll and carotenoids
- Qualitative tests for gums

B. Food Packaging Analysis

- Bursting strength test
- Puncture resistance test
- Drop test
- Identification of plastics
- Thickness measurement
- Water vapour transmission rate (WVTR)
- Gas transmission rate (GTR)
- Tear strength
- Migration test

C. Food Product Analysis

- **Honey:** Moisture, sugars, acidity, qualitative tests
- **Squash:** TSS, ash, acidity, total sugar, ascorbic acid
- **Jams:** Insoluble solids, reducing & non-reducing sugars, pectin

D. Dairy Product Analysis

- **Milk:** Total solids, fat (Gerber method), protein (Formol titration), lactose, adulteration tests
- **Milk Powder:** Moisture, protein, lactose, fat
- **Condensed Milk:** Acidity, total solids, fat, sucrose
- **Butter:** Moisture, acidity, salt, fat, saponification value

E. Beverage Analysis

- **Tea:** Moisture, ash, tannin, adulteration

- **Coffee:** Moisture, caffeine, extractives
- **Beer:** CO₂ content, alcohol, acidity
- **Vinegar:** Total acidity, non-volatile acidity

F. Cereal Analysis

- Wheat flour analysis – moisture, ash, gluten, sedimentation value

G. Product Development (Hands-on Training)

- Preparation of dehydrated fruits and vegetables
- Jam and jelly preparation (Pearson's square method)
- RTS and squash preparation
- Fruit preserves and candy
- Tomato puree and ketchup preparation
- Juice extraction (hot break & cold break method)

2. PG Exclusive Laboratory Experiments

Laboratory	Major Experiments
Food Technology Lab	Food additive analysis, packaging tests, milk & dairy analysis, beverage analysis, product preparation
Biochemistry Lab	Protein, carbohydrate, lipid estimation, enzyme and buffer preparation
Microbiology Lab	Staining, culturing, antibiotic sensitivity, ELISA, water & milk microbiology

1. List of Experimental Setup

1. Biochemistry Laboratory - Experimental Setup

A. Laboratory Setup

1. Reagent preparation area
2. Experimental work benches
3. Instrumentation area
4. Washing and sterilization area
5. Chemical storage area
6. Glassware storage area
7. Stock room

B. Basic Experimental Workbench Setup

A typical workbench contains:

- Micropipettes and tips
- Test tube stand
- Reagent bottles
- Distilled water wash bottle
- Marker and labels
- Waste container
- Tissue paper
- Glassware

C. Biochemistry Laboratory Experiments

1. Qualitative Analysis

These experiments identify biomolecules present

1. Detection of glucose – Benedict's test
2. Detection of proteins – Biuret test
3. Detection of lipids – Sudan III test
4. Detection of ketone bodies – Rothera's test
5. Detection of hemoglobin – Benzidine test

2. Quantitative Analysis

These experiments measure concentration of biochemical components.

1. Estimation of blood glucose – GOD-POD method
2. Estimation of serum protein – Lowry method
3. Estimation of hemoglobin – Sahli's method
4. Estimation of serum cholesterol – Zak's method
5. Estimation of urea – Diacetyl monoxime method
6. Estimation of creatinine – Jaffe's method
7. Estimation of bilirubin – Malloy–Evelyn method

3. Qualitative Analysis of Food Components

Identification of major nutrients in food.

Component	Test
Carbohydrate	Molisch test
Reducing sugar	Benedict's test
Protein	Biuret test
Amino acids	Ninhydrin test
Lipids	Sudan III test
Starch	Iodine test
Vitamin C	DCPIP test

4. Quantitative Analysis of Food

1. Estimation of total carbohydrate – Anthrone method
2. Estimation of reducing sugar – DNS method
3. Estimation of protein – Lowry / Bradford method
4. Estimation of lipid – Soxhlet extraction method
5. Estimation of Vitamin C – Titration with DCPIP

6. Estimation of ash content – Muffle furnace method
7. Estimation of moisture content – Oven drying method

5. Phytochemical Experiments (Plant Samples) - Extraction

Extraction methods:

1. Solvent extraction (Methanol, Ethanol, Acetone)
2. Soxhlet extraction
3. Cold maceration
4. Steam distillation (for essential oils)

Phytochemicals extracted: Alkaloids, Flavonoids, Tannins, Phenols, Saponins, Terpenoids, Glycosides

6. Qualitative Analysis of Phytochemicals

Phytochemical	Test
Alkaloids	Mayer's test
Flavonoids	Alkaline reagent test
Tannins	Ferric chloride test
Phenols	Ferric chloride test
Saponins	Foam test
Glycosides	Keller–Killiani test
Terpenoids	Salkowski test

7. Quantitative Estimation of Phytochemicals

1. Total phenol estimation – Folin–Ciocalteu method
2. Total flavonoid estimation – Aluminium chloride method
3. Tannin estimation – Folin–Denis method
4. Alkaloid estimation – Gravimetric method

5. Antioxidant activity – DPPH assay
6. Total carotenoid estimation
7. Chlorophyll estimation

8. Enzyme Experiments

1. Amylase activity assay
2. Catalase activity assay
3. Urease activity assay
4. Lipase activity assay
5. Acid phosphatase
6. Alkaline phosphatase
7. Serum Aspartate transaminase activity assay
8. Serum glutamate transaminase activity assay
9. Enzyme kinetic study- Effect of pH on enzyme activity, Effect of temperature on enzyme activity, Effect of substrate concentration on enzyme activity, Effect of enzyme concentration on enzyme activity, Effect of inhibitor concentration on enzyme activity

9. Separation Techniques Experiments

1. Paper chromatography
2. Thin layer chromatography
3. Column chromatography
4. Polyacrylamide Gel electrophoresis
5. Centrifugation – Cell fractionation
6. Dialysis – Protein purification

2. Microbiology Laboratory -Experimental Setup

A. Laboratory Sections

- a. Media preparation room
- b. Sterilization room
- c. Inoculation / aseptic transfer room
- d. Incubation room
- e. Culture storage room
- f. Washing and glassware section

B. Microbiology Lab Experiments for Bacteria

1. Isolation and Culturing of Bacteria
 1. Streak plate method – Isolation of pure bacterial colonies

2. Spread plate method – Isolation and counting bacteria
3. Pour plate method – Bacterial enumeration
4. Serial dilution technique – Reduce microbial load for counting
5. Standard plate count – Total viable bacterial count

2. Staining Techniques for Bacteria

1. Simple staining
2. Gram staining
3. Capsule staining
4. Endospore staining
5. Negative staining
6. Motility test (Hanging drop method)

3. Biochemical Tests for Bacterial Identification

Test	Purpose
Indole test	Tryptophan metabolism
Methyl Red test	Mixed acid fermentation
Voges–Proskauer test	Acetoin production
Citrate utilization test	Citrate metabolism
Catalase test	Hydrogen peroxide breakdown
Oxidase test	Cytochrome oxidase enzyme
Urease test	Urea hydrolysis
Starch hydrolysis	Amylase enzyme
Gelatin hydrolysis	Protease enzyme
Sugar fermentation test	Carbohydrate utilization

4. Antibiotic Sensitivity Test (Bacteria)

5. Isolation of Fungi

1. Isolation of fungi from soil
2. Isolation of fungi from bread
3. Isolation of fungi from air (settle plate method)
4. Isolation of fungi from fruits and vegetables
5. Pure culture of fungi on Potato Dextrose Agar (PDA)

6. Experiments using water, food, air, and soil samples

Sample	Experiments
Water	SPC, MPN, Membrane filtration, Isolation, Biochemical tests
Food	Total viable count, Yeast & mold count, Pathogen detection
Air	Settle plate method, Air sampling, Fungal isolation
Soil	Isolation of soil bacteria and Actinomycetes

3. Plant Tissue Culture Laboratory – Experimental Setup

A. Laboratory Sections

The plant tissue culture facility is divided into separate functional areas:

Section	Purpose
Washing room	Cleaning glassware
Media preparation room	Preparation of culture media
Sterilization room	Sterilization of media & instruments

Inoculation room	Aseptic transfer of explants
Culture room	Growth of cultures
Hardening area	Transfer of plantlets to soil

B. Common Experiments Conducted in Plant Tissue Culture Lab

1. Preparation of MS medium
2. Surface sterilization of explants
3. Callus culture
4. Micropropagation
5. Shoot induction
6. Root induction
7. Somatic embryogenesis
8. Synthetic seed preparation
9. Protoplast isolation
10. Anther culture

4. Molecular Biology Laboratory - Experimental Setup

A. Laboratory Layout / Sections

A molecular biology lab is usually divided into separate areas to avoid contamination.

Section	Purpose
Reagent preparation area	Buffer and solution preparation
DNA/RNA isolation area	Extraction of nucleic acids
PCR setup area	Preparation of PCR reactions
PCR amplification area	Thermal cycler

Gel electrophoresis area	DNA separation
Documentation area	Gel imaging
Cold storage area	Enzyme and reagent storage

B. Common Experiments Conducted in Molecular Biology Lab

1. DNA isolation from plant / bacteria
2. RNA isolation
3. Agarose gel electrophoresis
4. PCR amplification
5. Restriction digestion of DNA
6. Ligation
7. Plasmid DNA isolation
8. DNA quantification using spectrophotometer
9. Polyacrylamide Gel Electrophoresis
10. Western blotting
11. Transformation of bacteria
12. Immunology experiments- ABO blood typing, RA testing, ASO testing WIDAL test, WDRL test, EILISA techniques, Ouchterlony double immuno diffusion method

2. Laboratory facilities exclusive to the post graduate course

1. Biochemistry Laboratory - Laboratory Equipment available

- a. Analytical balance
- b. pH meter
- c. Hot plate
- d. Water bath
- e. Centrifuge
- f. Vortex mixer
- g. UV-VIS Spectrophotometer
- h. Colorimeter
- i. Incubator
- j. Light microscope
- k. Refrigerator (4°C)

2. Microbiology Laboratory - Laboratory Equipment available

A. Sterilization Equipment

1. Autoclave
2. Hot air oven
3. Bunsen burner
4. UV sterilization chamber
5. Membrane filtration unit

B. Culture Handling Equipment

1. Laminar airflow chamber
2. Incubator (BOD incubator)
3. Inoculating loop and needle
4. Petri plates
5. Micropipettes
6. Glass spreader (L rod)

C. Observation Equipment

1. Light microscope
2. Slide warmer
3. Staining racks

D. Storage Equipment

1. Refrigerator (4°C)
2. Culture racks

3. Plant Tissue Culture - Laboratory Equipment available

1. Analytical balance
2. pH meter
3. Magnetic stirrer
4. Hot plate
5. Measuring cylinders
6. Volumetric flasks
7. Micropipettes
8. Distilled water unit
9. Refrigerator (for hormones)

10. Autoclave (121°C, 15 psi)
11. Hot air oven
12. Membrane filter
13. Spirit lamp
14. Distilled water sterilization
15. Laminar Air Flow

4. Molecular Biology Laboratory - Major Equipment available

1. Micropipettes (0.1–10 µl, 10–100 µl, 100–1000 µl)
2. Refrigerated centrifuge
3. Vortex mixer
4. Water bath
5. Dry bath
6. pH meter
7. Analytical balance
8. Magnetic stirrer
9. Refrigerator (4°C)
10. Deep freezer (-20°C)
11. PCR Experimental Setup
12. Agarose Gel Electrophoresis Setup
13. Poly Acrylamide gel electrophoresis setup
14. Agarose Gel electrophoresis unit
15. UV transilluminator
16. Laminar airflow chamber
